REMARKS

In response to the final Official Action, Applicants have canceled Claims 6-9 and have filed a terminal disclaimer concurrently herewith to overcome the provisional double patenting rejection of Claims 60-61. The submission of this terminal disclaimer is not to be construed as an admission that any of the claims of the present application are obvious in view of U.S. Application Serial No. 10/639,163, which is assigned to the present assignee. Based on the above cancellation of Claims 6-9 and submission of a terminal disclaimer, Applicants respectfully submit that Claims 18-19, 21 and 60-61 are now in condition for allowance, which is respectfully requested.

Applicants would also like to call the Examiner's attention to an amendment to correct inventorship, which was filed on June 10, 2005. Applicants respectfully submit that the correction set forth in this amendment is now moor because the inventorship of the subject matter of the allowed Claims 60-61 includes Mario Au, Jiann-Jeng Duh and Chuen-Der Lien -- all the originally listed inventors. Applicants respectfully submit, therefore, that the present application should be allowed to issue with all three inventors listed in the originally set forth order.

Respectfully submitted,

Grant J. Scott
